Mounting devices for target systems

Description

- Mounting devices are used to install target systems in training areas, on walls or trees
- Mounting devices can be used with all target types (CF3U, CP and CPF)
- No extra tooling required for installation. The screw-wrench SW30 used to mount the target image is also used with specific mounting systems
- Target may be freely oriented
- Modular and highly rugged design (IP65).
- No loose parts
- Vibration, shock, temperature, wind, sand, and water tests
- Designed to be used for 25+ years
